About This Game

Trianguluv is an old-school arcade game placed in universe where even triangles can have feelings!

With simple controls you can focus on mastering your skill and beating challenging levels by solving puzzles and avoiding various obstacles such as moving parts, traps and more.

You will constantly need to observe the level in order to get to the exit.

Controls are optimized both for keyboard and controller.

Features

- Easy to learn but hard to master gameplay
- Various modes: classic, New Game+, No death
- Over 90 levels across all modes
- Awesome soundtrack
- Steam Trading Cards and challenging achievements

This game is very hard. if you want to have lots of ragequits, this is the one for you.. This game is very hard. if you want to have lots of ragequits, this is the one for you.. Want a challenge? This is your game. I have played it through the first handful of levels and it is already a challenge, the gameplay is so simple yet so difficult at the same time. In my opinion, the game as of right now is well worth the \$2.99, especially when compared to other games on steam that are at a similar price point. It even has a little replay value and as of right now 45 levels, possibly even more in the future to keep you entertained for at least a few hours or more.

Here is a video of gameplay including the first 10 levels give or take: https://www.youtube.com/watch?v=cmX8YDIG_Eg. One of the best Minigames I played in years. Fun to play, with good music and an entertaining background story!. As a fan of Gun Rocket I definitely wanted to try this game and can say I didn't regret finishing it the first time...

While starting a New Game+ I was positively surprised by some of the ideas implemented to make the levels a lot harder. I kept playing till I got stuck here:

<http://steamcommunity.com/sharedfiles/filedetails/?id=918808473>

I tried and tried, but had to contact the developer. He decided to change the level and I finally got an update:

<http://steamcommunity.com/sharedfiles/filedetails/?id=960265412>

I was still excited and continued playing past the 1st boss in New Game+. At a certain moment - while at this level 'Detour' - I came to the conclusion that the game wasn't a fun experience anymore; there was just too little room for error (again), and with that in mind, you were forced to move very slowly a lot of the time. Not a problem in case of a short level experience, but that wasn't the case a lot of the time. That aside, it's not possible to move backwards nor use a 'handbrake' or similar to completely park the triangle/rocket, making it only harder (especially with your 'Luv', where you sometimes need 4 eyes); not only unforgiven, also unfair I had to conclude, partially caused by slowness = annoyance. Checkpoints are recommended in some levels, but there are none.

A few recommendations for an update:

- 'Reverse gear' = moving backwards; only being able to make turns and rotate, often means dying through 1/3 edges of the triangle, because there's little room for error (in New Game+);

- The possibility to completely park the triangle, not moving a pixel;

- Level tests in New Game+...the progression in difficulty didn't always make sense, caused by a time limit, gravity (%) or fuel limitations;

- Level screen! Could have motivated me to continue or maybe I could have skipped a few levels first, if that would have been an option. I didn't have any insight regarding my progress, I could only find some numbers in the game data...

That being said, I can actually still recommend playing this game, because there's enough fun before you start a New Game+ - which I don't expect everyone to start anyway. I just have mixed feelings about the New Game+ Mode and actually regret having started it...I could eventually finish it, but when something's not entertaining anymore, it's better to stop. I left the game with a bad taste in my mouth.

7/10 - If you like Gun Rocket and are good at it, definitely try this, but think twice prior starting a playthrough in New Game+.
